

Decor and Furniture Ideas for Bathrooms

Bathrooms are no longer lonely entities used to brush teeth and for everyday routine. Not long back interior designers and home decor enthusiasts started paying attention to interior trends in bathrooms, to details like fine bathroom vanities, cabinets, faucets and sinks and arty bathroom mirrors and a fine lighting job. Some of us even started using antique furniture as vanities against the otherwise modern bath gadgets and bath dÃ©cor as an interesting contrast to a theme. Now the trend is serious and more people like to think of bath furniture as standard pieces of furniture like rest of the home.

Bath decor takes account of many fine aspects like wall colors, tiling, lighting, vanities and other accessories. To begin with wall-paint and tiles, whites have been in romance with our walls, especially in the West.

Maybe it is the feeling of cleanliness that the stark white or paper white, as they call it that made it popular, and is still a favorite, though the shades have mellowed more towards yellow-white or blue-white. In vogue since the early 20th century, the white-on-white bathroom continues to be in fashion even today.

As to the trend and practicality, agreed that white offers immense potential for colored accents such as shower curtains, wall art, backsplash, vanity, faucets, sinks where you could play on contrasts. It still is difficult to match up a dÃ©cor against paper white, maybe owing to its starkness. Neutral tones are the easiest bet to match up other items. If bolder wall colors appeal, think in terms of ten years down the line, would the color and tiling still appeal to you. If it is what you are absolutely sure of, go for it. For others, the safest bet is neutral tones, and you could always change other accessories when you renovate.

On bathroom vanities, there is a complete segment catering to a range of modern vanities fitted with all amenities one can imagine to be built-in for a deluxe bath appeal. A wooden vanity like the Simple freestanding unit is an ideal model for suave, big and undersized baths. Today the spaces are comparatively larger and the concept of vanity has grown into the essence of bath area. For beginners, it makes sense to measure the area and estimate the number of gadgets and bits and pieces you plan to install, like a tub that consumes space, or shower cubicle and others tit butts and later plan a reasonably sized vanity, but remember to have some space around, a cluttered bath with amenities may not be the best thing to have.

The next important factor is faucets and sinks. Installations may be a simple matter of logistics, but the right placement, material and finish is where the twist lies. Prior to 1930â€™s, nickel-plated brass faucets were used. Later, solid brass electroplated with chromium was use as a standard and is still in vogue. You get faucets in brushed nickel, brushed chrome that do not leave water spots or fingerprints as easily as some of the polished finishes. Though itâ€™s the integrated look that makes its impression, a great faucet can help in pitching on the style speech. Shapes play a role too, a spectacular one like the Arch Standing can look great with a deep vessel sink like the Dip Porcelain or the Quattro Stainless Steel.

Well-lit mirrors are great space enhancers. They also make an essential bath accessoryâ€”practical and artistic. The shape of a mirror can help you personalize a space. Pay attention to the lighting, for a glaring or poorly lit mirror can pose as a drawback to an bathroom. The size again depends on the area you have on hands, try to compliment the mirror with rest of the theme, especially the sink and faucet shape. Sometimes a contrasting mirror can do wonders to the way a bathroom looks, a mirror like Ira Oval can be used in fashioning a contemporary bath space.

Shaping a bath space can be a creative and satisfying experience especially when you picture the final outcome. There are many modern furniture outlets online displaying the latest in furniture trends, offering reasonable discount to its online customers. These stores are slowly gaining popularity owing to its convenience, affordability, and range of choice and ease of mind.
